Apply 2 Step 1 Query is modified to find all clients who live in cities that start with Bu

Field:	Client Number	Client Name	Bookkeeper Number	Balance Due
Table:	Client	Client	Client	Client
Sort:				Descending
Show:	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Criteria:			[Enter Bookkeeper Nu	
or:				

Apply 2 Step 2 Query includes Client Number, Client Name, Bookkeeper Number and Balance Due fields from the Client table

The records are sorted in descending order by Balance Due

Apply 2 Step 2 Query includes a criterion that allows the user to choose a bookkeeper when running the query

Bookkeeper-Client Query includes the Bookkeeper Number, First Name, and Last Name fields from the Bookkeeper table and the Client Number and Client Name from the Client table

The Bookkeeper-Client Query sorts the records in ascending order by Bookkeeper Number and Client Number

The Bookkeeper-Client report is based on the Bookkeeper-Client Query and appears as shown here and in Figure 2-89 on Page AC 130

Bookkeeper-Client Report
